

Attachment D:
Technical Evaluation Requirements

	Current Version	Future Version (Which one?)	Willing to Commit to Future Version?	Not willing to Commit
MPI IHE PIX / PDQ ADT Inbound v2.n Support of ADT Merging to MPI records Assignment of MPI value to create unique patient id				
Data Exchange Standards Supported IHE HL7 v3.0 CDA Translation Services from HL7 2.n to IHE or HL7 v3.0 Translation Services from IHE or HL7 v3.0 to HL7 2.n Development plans to support HL7 CDA v2				
Exchange Use Cases Supported CCD Document exchange via IHE XDS.b Consult Request / Consult Response Lab Orders Routing Lab Results Receipt / Routing HL7 MDM / ORU Results Routing Has your solution successfully participate in IHE Connectathon?				
Security Use of 3DES Encryption HIPAA Compliant ONC Security compliance NIST Compliance Does your solution support IHE Privacy & Security? Specifically IHE: ATNA, Consistent Time, BPPC, PWP, EUA, and XUA? File Integrity verification, MD5 Checksums Acknowledgements of HL7 LLP or HL7 MLLP, IHE				
Product Roadmap ACO Supportive technology Patient Centered Medical Home supportive technology Population Health Supportive technology				
Scope of Technical Services: Manage database maintenance (updates, backups, patches) Manage server maintenance (updates, backups, patches)? Manage system alerts				
Software Utilities / Other Data translation services (one format to another) Are the translation services configurable by customer? Configurable Script utility to emulate end user input Common data repositories for mapping ICD9/10, LOINC, RXNorm, NPI values Are the repository mappings configurable by customer? Portal solution Is the portal configurable by the customer? ODBC connectivity to HIE data model? Full or restricted? Rules engine Is the Rules engine configurable by customer? Interface development tool Is the interface development tool open to the customer?
